

First Alert®

First Alert® Tundra™ Fire Extinguishing Spray Model AF400

Product Fact Sheet

The First Alert® Tundra™ Fire Extinguishing Spray is a new, innovative product designed help to put out household fires fast. Developed to provide another home-safety tool for consumers who find traditional fire extinguishers intimidating to use, Tundra™ Fire Extinguishing Spray contains a powerful, proven and effective liquid firefighting agent in a familiar spray can package similar to other household products. Tundra™ Fire Extinguishing Spray is effective on common household fires including paper, fabric, wood, cooking oil and electrical fires.

Proprietary-Wide Spray Nozzle

The unique, patent-pending design of Tundra™ Fire Extinguishing Spray is as easy to use as other familiar household products and covers a wider surface area—up to three times¹ greater than a typical actuator. Designed specifically for developing fires, the point-and-spray technology provides users with more control. No pins to unlock or pull or levers to squeeze.

Compact and Lightweight

With its compact size (Tundra™ Fire Extinguishing Spray is just 9.65 inches tall) and weight of only 22 ounces, Tundra™ Fire Extinguishing Spray allows users easier maneuverability than traditional fire extinguishers that require coordinated hand movements. The small size of Tundra™ Fire Extinguishing Spray means it can also be conveniently placed in upper or lower cabinets or right on the countertop in the kitchen, utility room, home office or near a fireplace. It is a great product for any room of the house.

Patented Discharge Technology

Designed for one time use, an internal pouch isolates the contents from the pressure. When the spray nozzle is pressed, only the contents are released and the propellant stays inside the can so the fire is not agitated. In addition, the discharge time for Tundra™ Fire Extinguishing Spray is four times² greater than household fire extinguishers allowing the user to react more quickly.

Easy Cleanup

The firefighting agent in Tundra is biodegradable and easy to cleanup. Simply wipe the surface area clean with a damp cloth after use and after the fire has cooled down.

Other Features

- Requires no shaking.
- Can be pointed from any orientation at a distance of three to four feet.

For more information, or a home-safety checklist, visit www.firstalert.com.

- ¹ Three times wider surface area;
typical actuator—14 in² vs. Tundra™ actuator—48 in²
- ² Four times greater than 2-B:C or 5-B:C kitchen fire extinguisher;
minimum of approximately 32 seconds vs. approximately eight seconds.
